Press Release

LEIBINGER strengthens Security Printing Solutions business unit – Dietmar Waizenegger takes the helm

By strategically realigning its numbering machines business, LEIBINGER is strengthening its position as one of the world's leading specialists in the serialisation of banknotes and security documents.

Tuttlingen (Germany), 13 October 2026. LEIBINGER has strategically and organisationally restructured its long-established numbering machines business, which has operated under the name Security Printing Solutions (SPS) since 1 October 2026. The new structure brings together the company's expertise in high-security printing, strengthens its focus on international customers and lays the foundations for the continued, targeted development of this specialist business area.

Experienced industry expert takes the lead

The business unit will be led by **Dietmar Waizenegger as Head of Security Printing Solutions**. Waizenegger has many years of experience in the international market for security printing solutions and previously spent many successful years working for LEIBINGER in this business area. He combines in-depth technical expertise with strong sales and management skills.
In his new role, Waizenegger will be responsible for the strategic and operational development of the business unit. His priorities will include supporting international customers, managing the product portfolio and successfully delivering demanding customer projects.

Precision trusted worldwide for more than 75 years

LEIBINGER is one of the world's leading suppliers of high-precision numbering machines and systems for banknote and security printing. For more than 75 years, the family-owned company based in Tuttlingen has stood for precision engineering, quality and reliability. **Throughout its history, LEIBINGER has brought around 4.5 million numbering machines to market worldwide** – an impressive testament to the company's extensive experience and international standing.

Its technologies are used by banknote printers around the world: every day, several million banknotes worldwide are given their individual serial numbers using LEIBINGER numbering machines.

The company's particular strength lies in its long-standing experience in developing and manufacturing high-precision mechanical components. From number wheels and switching mechanisms to the smallest individual parts, its numbering machines are designed for maximum precision, durability and reliable interaction between all components. Engineered for many millions of numbering operations, they meet the demanding requirements of the international security printing industry.

Over several decades, LEIBINGER has established an outstanding position in this highly specialised global market. This wealth of expertise also forms the foundation for the future development of the Security Printing Solutions business unit.
