

Press release

Everyone's a winner at PACK EXPO Chicago with LEIBINGER

Germany's Innovator of the Year, LEIBINGER, rolls out the red carpet for industry professionals to experience the award-winning IQJET at PACK EXPO in Chicago. Manufacturing and packaging professionals are invited to experience this groundbreaking coding and marking solution from November 3–6 at Booth #3936 in the South Building.

Chicago, IL – September 25, 2024 – LEIBINGER, recently named Germany's Innovator of the Year, is set to make a major impact at PACK EXPO Chicago 2024. At Booth #3936 in the South Building, LEIBINGER will showcase its award-winning IQJET Continuous Inkjet (CIJ) printer – a product that has already earned the Gold German Innovation Award. The real winners, however, are LEIBINGER's customers, who benefit from unmatched advantages across their production lines.

A Star Attraction for Industry Leaders

In an era where efficiency, reliability, and sustainability are paramount, the IQJET emerges as a solution tailored to the needs of production managers, engineers, and operations professionals. The IQJET is not just another printer; it's the world's first intelligent coding and marking system designed to meet the evolving demands of modern production lines. Combining advanced technology with user-centric design, the IQJET offers unparalleled efficiency, reliability, and performance. Its intelligent features simplify operation, minimize maintenance, and elevate print quality, making it an essential asset for manufacturers across various industries.

Win on Cost Reduction

With the IQJET, businesses can achieve significant cost savings. This groundbreaking printer is designed to be maintenance-free for five years, ensuring the lowest total cost of ownership (TCO) on the market. Its innovative solvent recovery system reduces solvent consumption by up to 50%, utilizing every cartridge down to the last drop. This means less waste and no hazardous disposal costs, which is a win for both your wallet and the planet.

Win on Productivity

LEIBINGER's unique fully automatic nozzle sealing technology ensures uninterrupted production by preventing ink from drying out, eliminating the need for frequent cleaning cycles, and enabling instant start-up every time. The IQJET takes this a step further with IQPRINT, which combines nozzle sealing technology with smart ink management. By sealing the nozzle 100% airtight and regulating ink temperature and viscosity, this ensures consistently high print quality regardless of the ambient conditions. With features that enhance flexibility, automate processes, and simplify user operation, your team remains productive and efficient throughout the day.

Win on Performance

Built to perform in the most demanding environments, LEIBINGER printers deliver reliable, high-quality prints even at the highest speeds. With a rating of up to IP66 available, the IQJET excels in even the harshest conditions, delivering durability and performance where it matters most. Its Plug & Print performance allows it to start up instantly and integrate seamlessly into your production line, minimizing downtime and maximizing throughput.

"Any manufacturer who values outstanding efficiency and reliability will greatly benefit from the IQJET. Here at MAGGI, we also appreciate the fact that our employees now have more time to focus on the essentials such as safety and product quality."
-Simon Keller, Technical Group Leader, Area Packaging Deli / Tainer, MAGGI

Innovation That Drives Your Success

At LEIBINGER, innovation isn't just about winning awards – it's about creating solutions that help customers succeed. Every enhancement and new feature is crafted with unique industry challenges in mind, ensuring every customer has the right tools to stay ahead in a competitive packaging market.

LEIBINGER invites industry professionals to walk the red carpet at Booth #3936 in the South Building at PACK EXPO Chicago and discover how their advanced coding and marking solutions can turn your production line into a winning asset.
